TECHNICAL SKILLS

Power BI / DAX SQL Server Python
Pandas scikit-learn Excel Advanced
ETL / SSIS Oracle Snowflake
NLP / BERT Git / GitHub
Data Modeling

CERTIFICATIONS

Python for Data Science, AI & Development : Coursera
SQL: Data Reporting and Analysis : Coursera
Data Analysis with Python : LinkedIn
Preparing Data with Microsoft Excel : LinkedIn

LANGUAGES

Arabic Native
French Fluent
English Professional

EDUCATION

Master's, Data Science & Intelligent Systems
Multidisciplinary Faculty, Nador | 2021–2023
Bachelor's, Computer Science & Engineering
FST, Settat | 2020–2021

PROFILE

Data Analyst with 2+ years of experience in industrial environments, having independently designed and deployed a factory's entire data infrastructure (Excel → SQL Server → Power BI). Results-driven and analytical: reduced production waste by **52%** through root-cause analysis, and built fraud-detection validation rules using machine coefficients. Strong command of Power BI (DAX), SQL Server, and Python applied to turning shop-floor data into concrete recommendations for management.

PROFESSIONAL EXPERIENCE

• Data Analyst — RotoPrint Sarl

Casablanca | June 2024 – Present | Industrial manufacturing

- **Full autonomy:** Independently designed and deployed the factory's first end-to-end data infrastructure (Excel → SQL Server → Power BI), from architecture to delivery
- **Reduced production waste by 52%** (25,000 → 12,000 kg/month) by identifying machine product mismatches across 18 machines
- **Detected data integrity fraud:** built a validation rule based on machine reel coefficients, revealing inflated production reporting
- Designed Power BI dashboards (DAX, data modeling) for stock, sales/payments, and production translated into operational recommendations
- Administered ERP system (sales, production, article modules); authored daily and monthly reports

• Data Science Intern — 3D Smart Factory

Casablanca | March 2023 – October 2023

- Built an NLP-based product recommendation system using collaborative filtering (SVD), LSTM/RNN, and fine-tuned BERT — improved accuracy over baseline

• Web Development Intern — WebSuccess Sarl

Casablanca | April 2021 – July 2021

- Developed a web management app for the Royal Moroccan Triathlon Federation (Angular, ASP.NET, Swagger API)

KEY PROJECTS

- ▶ Customer Shopping Behavior Analysis (Python, SQL, Power BI)
- ▶ Car Price Prediction with Machine Learning
- ▶ Power BI Sales Report with AdventureWorks.
- ▶ Film Rating Data Analysis Using a Data Warehouse.
- ▶ Email Classification as Spam and Non-Spam.
- ▶ Designed a Distributed Database Across Multiple Sites Connected by a Virtual Network in Oracle.
- ▶ Sales and Customer Payment Dashboard with Power BI.
- ▶ Production Analysis and Industrial Waste Management with Power BI.
- ▶ Data Scraping from Various Websites and Social Media.
- ▶ >Multi-Company Stock Management Dashboard with Power BI.
